# SmartView Graduate

Getting Started

Humanware™

This document will show you how to install the software and assemble the SmartView Graduate. A list of commands is also included to help you get the most out of your SmartView Graduate's many features.

CAUTION: Do not connect the SmartView Graduate to your computer before installing the Graduate Setup software.

1. Contents of the Package

- **Camera**
- **Base plate**
- **Arm**
- **Two USB cables**
- **One controller cable**
- **CD-ROM**
- **Camera Case**
- **Getting started guide**

2. Assembling SmartView Graduate

Note:

- **The Controller cable connecting the camera to the arm is needed to operate the zoom function from the computer keyboard.**
- **Depending on your computer's power output, one or two USB cables will be required to operate the Graduate. Plug in both cables and verify correct operation. Unplug the USB cable connected to the lower connector of the controller box located on the arm. If your Graduate continues to operate correctly, including zooming of the image, then you only need to use one USB cable. If it does not work correctly you must use both cables.**

3. Installing Graduate Setup Software

Requirements: Windows XP or Vista installed on the PC.

Insert the installation CD into the CD-ROM drive and follow the instructions.

If the installation procedure does not begin automatically, use Windows Explorer to find on your CD a file called SmartViewGraduateSetup.exe Double click this file to launch installation.

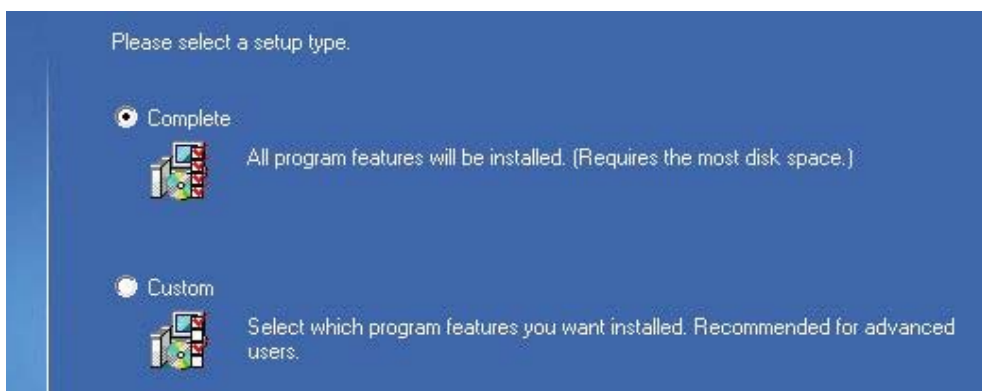

Select installation language.

Click Next to continue.

License Agreement

Technologies HumanWare Canada Inc End User License Agreement

Technologies HumanWare Canada Inc provides you with the software program included in the package accompanying this agreement (the program) and licenses you to use this program. The license granted to you is nonexclusive and does not grant ownership rights. As a licensed user (Licensee), you should understand that you do not own the program and the instructional materials that accompany the program; you are only licensed to use the program and instructional materials

◉ I accept the terms of the license agreement   Print

Read the License agreement and click the option stating that you accept the terms of the license agreement and select Next.

Please select a setup type.

◉ Complete
   All program features will be installed. (Requires the most disk space.)

◉ Custom
   Select which program features you want installed. Recommended for advanced users.
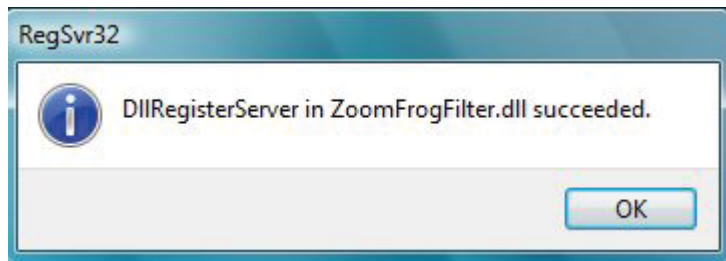

Click Next to continue installation at the default location.
If you wish to select a different installation location, select Custom and click Change.

Click Install to begin the installation.

If you want to review or change any of your installation settings, click Back. Click Cancel to exit the wizard.

Press the Install button to begin installation.

RegSvr32

DllRegisterServer in ZoomFrogFilter.dll succeeded.

OK

A window will inform you that the necessary files have been installed. Press OK.
InstallShield Wizard Complete

The InstallShield Wizard has successfully installed SmartView Graduate. Click Finish to exit the wizard.

A window will inform you that the installation was successful. Press Finish to end software installation.

You may now plug in the two USB cables that connect the SmartView to your computer. The computer will now attempt to install the hardware drivers.

If the device drivers have not already been installed, you will have to instruct Windows on how to install these drivers.

Select Locate and install driver software. The computer will locate the driver and install it. This may take a few minutes.

This small pop up window will appear at the bottom of the screen to inform you that the hardware drivers have been successfully installed on your computer. You may now launch your SmartView Graduate by double-clicking the desktop icon.

4. Using the SmartView Graduate

If you intend on using ZoomText, make sure to launch it before starting the SmartView Graduate software.

Adjust the camera angle to capture what you want to see and view it on your computer screen. Position the lens in front of the camera to view material placed on the Base plate.

The following commands can be used to modify or save the resulting image.

Function	Key	Alternate Key
Zoom In / Zoom Out	+ / -	
Rotate Image 90 degrees	R	F6
Brightness adjustment (1)	, or .	
Contrast adjustment (1)	CTRL + , or .
